Industrial Data and Industrial Area Data

In March 2025, the Minister of Industry of the Republic of Indonesia (the “**Minister**”) issued Regulation of the Minister No. 13 of 2025 regarding the Procedures for the Submission of Industrial Data, Industrial Area Data, Other Data, Industrial Information, and Other Information through the National Industrial Information System (“**RM 13/2025**”), which came into effect on 27 March 2025.

RM 13/2025 obliges every industrial company to submit industrial data and every industrial area company to submit industrial area data to the government. In addition, upon the Minister's request, both industrial companies and industrial area companies are also required to submit other data, apart from industrial data and industrial area data. The key provisions of RM 13/2025 are as follows:

1. Industrial Companies and Industrial Area Companies

An industrial company refers to any person engaging in industrial business activities domiciled in Indonesia. Meanwhile, an industrial area company refers to a company engaging in the development and management of industrial areas.

An industrial area is an area designated for the concentration of industrial activities, equipped with supporting facilities and infrastructure, which is developed and managed by an industrial area company.

2. Industrial Data, Industrial Area Data, and Other Data

Both industrial data and industrial area data refer to factual information recorded or documented in the form of numbers, letters, images, maps, and/or similar formats, which objectively reflect actual conditions at a given time, are value-free, and have not yet been processed. The distinction lies in the scope: industrial data relates to the activities of industrial companies, whereas industrial area data relates to the activities of industrial area companies.

In addition, other data refers to data related to the industrial sector that may, from time to time, be requested by the Minister from industrial companies and/or industrial area companies.

The submission of industrial data, industrial area data, and other data is carried out through the National Industrial Information System (*Sistem Informasi Industri Nasional - “SIINas”*), a system managed by the Minister. Accordingly, industrial companies and industrial area companies are required to have a SIINas account.

3. Submission of Industrial Data and Other Data by Industrial Companies

a. Industrial Data

The submission of industrial data by industrial companies is carried out during the construction stage and/or the production stage, as follows:

No.	Stage	Reporting Category	Industrial Data
1	Construction	Small industries	Among others, planned installed capacity, planned raw material requirements, construction implementation plan, and others
		Medium and large industries	Among others, diagrams of the process of converting raw materials into final products, workforce during the construction stage, investment, and others
2	Production	Small industries	Among others, production capacity, installed capacity, production output, raw materials, workforce, machinery and production equipment, and others
		Medium and large industries	Among others, ownership percentage, investment value excluding land and buildings, production and sales, raw and auxiliary materials, workforce, and others

The submission of the above industrial data is to be carried out quarterly each year.

b. Other Data

Industrial companies are required to provide other data in the form of supplementary data, data clarification, and/or extraordinary events within the industrial company, which must be submitted through SIINas no later than 3 (three) days after receiving the request. Such requests for other data may be delivered by the Minister through SIINas, written correspondence, electronic mail, telephone, or an on-site visit to the industrial company.

4. Submission of Industrial Area Data and Other Data by Industrial Area Companies

a. Industrial Area Data

The submission of industrial area data by industrial area companies is carried out during the construction stage and the commercial stage, as follows:

No.	Stage	Industrial Area Data
1	Construction	Among others, industrial area land, land acquisition, off-site and on-site infrastructure, supporting facilities, energy and raw water requirements, investment realization, and workforce
2	Commercial	Among others, business revenues, operating expenses, industrial area land, off-site and on-site infrastructure, supporting facilities, investment realization, industrial plot sales/leases, and others

The submission of the above industrial area data is to be carried out quarterly each year.

b. Other Data

Industrial area companies are required to provide other data in the form of supplementary data, data clarification, and/or extraordinary events within the industrial area company, which must be submitted through SIINas no later than 3 (three) days after receiving the request. Such requests for other data may be delivered by the Minister through SIINas, written correspondence, electronic mail, telephone, or an on-site visit to the industrial company.
